

## Plant equipment and components

# Boilers and pressure parts

As one of the leading manufacturers and suppliers worldwide we offer a complete range of equipment and components for waste-to-energy and biomass boilers.

Our designs and constructions are the latest technologies within the power industry, and our service organization ensure optimal plant performance for our customers.

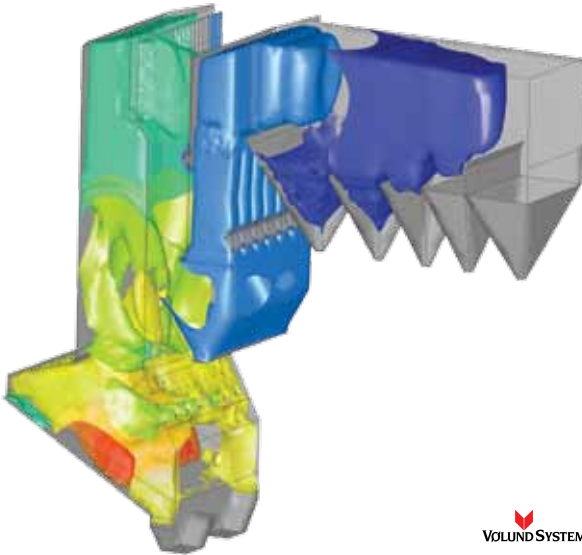

### We offer inspection, production and installation of all pressure parts such as:

- Boiler walls
- Superheaters
- Boiler drums
- Evaporators
- Water-cooled wear zones
- Economizers
- Inconel corrosion protection

### We are certified according to the following standards:

- ISO 9001:2000
- AD 2000-HPO
- EN/ISO 3834

VØLUND SYSTEMS

### State-of-the-art technologies

Our services comprise everything from supply of standard components to complete and complex revamping of entire plants. Our technologies are based on our wide experience, skilled specialized staff and computerized calculation tools such as CFD (Computational Fluid Dynamics).

### Experienced assistance

Our skilled welders and fitters are experienced in all types of work on pressure parts, and they are available 24 hours a day on your request.

### Committed revision management

We offer to organize and carry out the complete work during revision periods. Such assistance will reduce your downtime and staff involvement.

### Avoid breakdown

We carry out plant condition assessment followed by an elaborate report including suggestions for preventive measures to avoid costly plant breakdowns.

For further information please contact our sales team or visit [www.volund.dk](http://www.volund.dk).

*Our certified welders and fitters carry out high-quality work and are available 24 hours a day.*

*We inspect, produce and install all types of pressure parts, for instance boiler walls.*
